Education

FAST NUCES ISLAMABAD — Aug 2022 – June 2026
Bachelor of Science in Computer Science

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Databases, Operating Systems, Software Engineering, Artificial Intelligence, Machine Learning
Technical Skills: Python, JavaScript, TypeScript, C++, Java, Node.js, Express.js, React.js, Next.js, Flutter, TensorFlow, PyTorch, REST APIs, GraphQL, PostgreSQL, MongoDB, MySQL, Firebase, Supabase, Vector Databases, Docker, Git, GitHub, Vercel, Postman
AI/ML: Machine Learning, Deep Learning, Computer Vision, NLP, Prompt Engineering, RAG, LangChain, OpenAI APIs, Gemini API, AI Agents, MCP Integration, Model Deployment, CI/CD

Work Experience

Full Stack Developer — **December 2025 – Present**
Genius Dev Studios — *(Freelance)*
- Built and maintained full-stack web applications using React, Next.js, Node.js, and Firebase, delivering scalable production-ready solutions.
- Designed scalable backend architectures and RESTful APIs to support high-traffic applications and ensure reliable data flow.

AI Automation Engineer — **July 2025 – Sep 2025**
Software Productivity Strategies — *Islamabad, Pakistan*
- Built AI-driven automation workflows to reduce repetitive manual tasks and improve team productivity.
- Developed and deployed productivity tools using Python and TensorFlow to streamline core business operations.

AI Web Intern — **May 2025 – Jun 2025**
Nexium
- Developed AI-powered web features and integrated machine learning models into frontend applications.
- Optimized AI-driven UI components and workflows to improve usability and user engagement.
- Built reusable web components and integrated REST APIs to connect AI backend services with frontend systems.

Projects

PropTalk (Voice AI – FYP 2026) — Live
- Built an AI-powered voice receptionist for real estate agencies to automate inbound and outbound calls 24/7.
- Reduced lead loss caused by missed after-hours calls through automated lead qualification and appointment scheduling.
- Integrated Twilio for call routing, OpenAI Whisper for real-time speech-to-text, and Gemini LLM for context-aware conversations.
- Implemented text-to-speech responses with low-latency voice interactions.
- Utilized Mem0 for cross-session memory and sentiment analysis for lead prioritization.
- Developed a Next.js and React dashboard for monitoring call logs, lead status, and analytics.
- Used MongoDB to manage property listings, customer profiles, and call history.

Modern Body Measure — Live
- Architected and developed a fitness tracking platform for workout logging and progress monitoring.
- Built with Next.js (App Router), React, and TypeScript using a scalable component-based architecture.
- Integrated Supabase for PostgreSQL database management, authentication, and secure session handling.
- Implemented interactive progress visualizations, challenge scheduling, and responsive UI components.
- Utilized Tailwind CSS, Radix UI, and Framer Motion to create a modern user experience.
- Added push notifications, theme support, and API-driven integrations for production readiness.

Demo Dallas Concierge — Live
- Developed an AI-powered concierge platform for World Cup fans, providing real-time conversational assistance.
- Designed LLM-based workflows with contextual memory to support personalized multi-turn interactions.
- Integrated third-party APIs for venue information, event schedules, and location-based recommendations.
- Built scalable backend services capable of handling high concurrent traffic during live events.
- Implemented an administrative dashboard for venue management, query monitoring, and engagement tracking.
- Focused on delivering low-latency, context-aware responses for large-scale event environments.
